Have you been wondering what some of these words mean? We have compiled a few definitions for some of the most common terms.

- Bandwidth - The amount of information downloadable through your ISP over a prescribed period of time. Typically dialup modem is slow, DSL is faster and Cable modem delivers the best data throughput.

- Webpreneur - A webpreneur is one who creates, manages, and maintains a business exclusively on the Internet

- CMS - Content Management System is an application used to maintain/manage web content and web pages
